PROJECTS

Room Rental Marketplace – Airbnb Clone | github.com/Ankit-Tiwary45

- Built a full-stack Room Rental Marketplace web application inspired by Airbnb using React.js, Node.js, Express.js, and MongoDB.
- Implemented interactive room search, date range availability reservation, price range filtering, and host property listing management.
- Designed secure user authentication with JWT, MongoDB spatial schema indexing, and responsive image showcases.

Library Management System | github.com/Ankit-Tiwary45/Library_Management_system

- Built a full-stack Library Management System using HTML, CSS, JavaScript, Node.js, Express.js, and MySQL.
- Implemented JWT authentication, role-based access control, and CRUD operations for books, users, and issue/return management.
- Designed a responsive dashboard with search, filtering, pagination, and automated fine calculation using RESTful APIs.

Hospital Slip Management System | github.com/Ankit-Tiwary45/Smart_slip_management_system

- Developed a full-stack slip management system to create, store, update, and track digital slips efficiently.
- Implemented secure user authentication and role-based access control for managing doctors or patient slip records.
- Integrated MongoDB for structured data storage and optimized database queries for faster record retrieval.
- Built a responsive user interface using React.js to simplify slip submission and monitoring.
